Company Profile

LAKHDATA is a comprehensive, full-service marketing, advertising, and web development firm based in Chandigarh and Mohali (Punjab). Established in 2005, LAKHDATA has deep experience in all media and aspects of marketing.

LAKHDATA areas of expertise include: brand events and developments, installations of outdoor and indoor branding print and interactive design and social networking also. We define strategic plans to develop relationships.

Philosophy at LAKHDATA we are devoted to discovering more effective ways to communicate with our client's target markets. This means constantly digging, probing, learning and experimenting with alternative solutions. We determine and execute the tasks it takes to promote our clients, brands, products, events and their people.

We help our clients to identify goals, and then we take responsibility for providing cross platform tactics to accomplish them. We work within budget constraints and we meet deadlines. Creativity is our hallmark and we deliver results. LAKHDATA has evolved with its clients with the marketplace and technologies. Our experience and capabilities enables us to advise and guide our clients to achieve success more efficiently than trial and error methods.

Our mission is to help our clients to grow their companies and nurture their brands with wellcrafted marketing communications. We have helped over 25 clients to grow their businesses in a wide range of industries. We are brutally honest and pragmatic. Our passion at LAKHDATA is merging the latest techniques in marketing with strategic thinking and highly creative executions.

LEADERSHIP

A simple definition is that leadership is the art of motivating a group of people to act towards achieving a common [goal](#). In a business setting, this can mean directing workers and colleagues with a strategy to meet the company's needs.

This leadership definition captures the essentials of being able to inspire others and being prepared to do so. Effective leadership is based upon ideas (whether original or borrowed), but won't happen unless those ideas can be communicated to others in a way that engages them enough to act as the leader wants them to act.

Put even more simply, the leader is the inspiration and director of the action. He or she is the person in the group that possesses the combination of personality and leadership skills that makes others want to follow his or her direction.

TEAM WORK

An illustration showing a group of approximately 15 stylized human figures of various ethnicities and ages. They are all holding up their arms to support the large, bold, black letters of the words 'TEAM WORK' which are positioned above them. The figures are standing on a light blue oval shadow on a white background.

Teamwork happens when each of us are committed to making it happen. Great teams are made up of great teammates. When we work together we can do things we couldn't do alone.

“The Hare and the Tortoise.” As you will remember, the hare and the tortoise had a race. At the start of the race the hare took off quickly and was almost out of the site of the tortoise. About half way through the race, the hare, in contempt, decided to take a nap. As he did, the tortoise kept moving along until he eventually passed the sleeping rabbit and won the race.

Did you know that there were three additional races?

1st : Because the hare knew he could beat the tortoise because of what he had learned in the first race, he challenged the hare to a rematch. This time the hare started the race quickly and never slowed down, easily winning the race.

2nd : Like the hare, the tortoise also learned something from his loss. The tortoise proposed a new race route he had ran in before, which the hare gladly accepted. The race started as the previous two had, the hare started quickly running with all of his might. But the new route included a river and the hare couldn't figure out how to cross it. He didn't see any bridges and there wasn't anyone to ask for directions from. As he continued to think about ways to get across, the tortoise, slowly walking past the hare, dived into the river, swam to the other side and crossed the finish line.

3rd : Because the hare and the tortoise had spent so much time together, they had quickly become friends. They decided to race again, but this time together. They both felt they could break the course record if they capitalized on each other's strengths instead of competing against one another. As the race started the hare carried the tortoise on his back. When they got to the river, they switched and the hare rode the back of the tortoise. And when they got to the other side they switched again all the way to the finish line and in record time.

Without the personal commitment of both the hare and the tortoise, neither of them would have been able to break the course record. The director of the course could have given suggestions on how to run the course based on what she had seen others do. Or race coaches could have given them tips on how to go faster. But until they both made a personal commitment to work together, the record wouldn't be broken.

UV Flatbed Printing

The introduction of the UV flatbed printer is a great addition to our custom production abilities. Displays2go's current in-house printing capabilities include vinyl/digital heat press, silk screening, and solvent digital printing. The flatbed design of the UV printer allows us to produce the same high quality work as our solvent printers, only on thicker substrates! Our silk screening machinery does accommodate thicker materials, Wood, Glass, Stone, Fabric and acrylic, however these orders typically come with minimum order quantities which might not meet the needs of every customer. This same high quality output with added flexibility makes the new printer a great companion to our current production abilities. This makes us a one-stop-shop for any and all business displays you might need!

Machine Profile

Take Advantage of Third-generation - Hp Latex Printing Technologies

Exceed client expectations with production speeds ideal for handling urgent jobs. The HP Latex 360/560 Printer produces indoor and outdoor prints on a variety of traditional signage substrates—even textiles¹. And high-quality, durable prints provide scratch resistance comparable to hard-solvent inks².

HP Latex 360/560 Printer

Cnc Router

Features

16 Ft Acp Signage Without Any Joint

Machine Enclosure / Guarding

CNC routers have a machine enclosure for safety and containment of chips and cutting fluids.

Multiple Spindles

Multiple spindle heads allow routers to use several cutting tools to perform different operations with a single machine setup.

Tool Changer

Tool changers allow CNC routers to perform more than one function without requiring an operator to change the tooling.

Vacuum Table

The router table has a vacuum system to fixture the parts to be machined.

Inkjet Printer

Rf-640 Large-format

Advanced *Print Technology*

The **VersaEXPRESS RF-640** is equipped with a gold-plated print head to reduce static and enable high quality imaging. Variable dot control produces droplets of seven different sizes for precise, detailed graphics, excellent photographic reproduction, smooth gradations and superb contrast. Roland Intelligent Pass Control precisely controls dot placement between passes, allowing the **VersaEXPRESS RF-640** printer to produce smooth gradations, exceptional solid colors and optimal image quality in all print modes, including higher speeds.

Unique Laser

LASER CUTTING MACHINE

Unique Laser Engravers are pioneers in importing laser technology in India for application in the field of signages, model making, cutting on sun board, acrylic, wooden, metal and it is good for engraving.

Channel Letter Bender Machine

We are a well reputed company, engaged in offering a high quality range of Channel Bending Machine. Our provided bending machine is well known in the market for its efficient quality control measures. This bending machine is developed from the top notch basic material and latest technology in accordance with the universally accepted standards. Our bending machine is tested on different stages in order to assure its excellence.

Cold Laminator Lbs-1000 (1500mm)

We hold all the aces in designing and developing qualitative Cold Laminating Machines. These machines are precisely fabricated by making use of optimum-grade basic material and components in complete adherence with the defined parameters of the industry. Keeping in mind multifarious demands of the clients, we offer these products in different technical specifications so as to meet variegated demands of the clients.

Vinyl Cutting Plotter

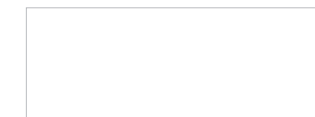

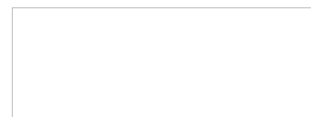

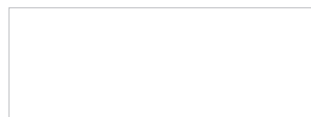

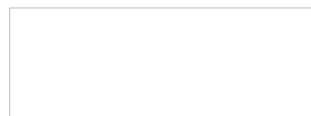

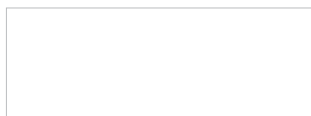

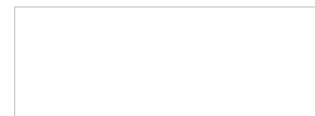

Graphtec Ce6000-120

The CE6000 Series plotters employ a digital servo drive system to achieve high-speed and high-precision cutting. In addition to cutting marking film and other media, an CE6000 series plotter can also be used as a pen plotter. To ensure high cutting quality and optimal productivity.

Auto Registration Mark Sensor Fast & Accurate Digital Servo Motor four Point, Dual-Axis Skew Correction Tangential Control enhanced precision

OUR PREMIUM CLIENTS

media description for branding

Vinyl Printing media line consists of white flexible calendered & cast vinyl films coated. Vinyl is a white opaque glossy PVC. This is designed to meet high resolution printing with excellent color. One year durable calendered film.

Translite is a large illuminated film backing typically used as a backlit. The name of Translite originally came from the black-and-white. Translite or Backlit printing of translucent posters and signs offer brilliant color that glows from the image when the sign is lit up. Glossy or matte finish on a backlit give excellent results when lit from the back. Digital printed backlits can be used indoors.

Oneway vision as name implies is a self adhesive banner film of vinyl material which allows vision from one side and block the same from other side. Purpose of these film is to make glass window not just a source to hide inside view, but also act as a great advertising tool.

or foam board is a very strong, light, and easily cut sheet material used for the mounting of vinyl prints, as backing in framing, and for painting. It usually has three layers an inner layer of polystyrene foam and a white claycoated paper on the outside.

Front lit banner is used when you have lights pointing in the front of the banner. It is white opaque substrate with 340 gsm thickness. It has soft and delicate surface. These banners come in both gloss and matt finish. They can be used outdoor and indoor with ease as they are weather resistant.

Backlit flex banner is used when you have lights pointing in the back of the banner. It is white opaque substrate with 510 gsm thickness. These banners have high transmittance. They are specially coated for digital printing. They can be used outdoor and indoor with ease as they are weather resistant and water

MS Pipe ERW square & rectangular pipes are also called, rectangular hollow section or square hollow sections. These are used for general engineering and structural purposes. The process or manufacturing is by electric resistance welded. However, in some cases square & rectangular seamless pipes may also be

Aluminum clip-on LED - backlit frame aluminum frame exquisite form, portability, Available silver colour. Flip-flop, easy to change graphics & install. Thickness only 25.4mm width only 38mm. Use high-quality light source with effective protection on image avoid yellowing with age 70% to 80% energy saving compare with traditional light-box. The Translite Printing we offer to clients for its work quality.

Acp sheet aluminum composite panel material (ACP) is formed by laminating a central core of thermoplastic material with an outer skin of aluminum sheet. ACP can also be formed and bonded in a similar fashion to other composite materials to produce a variety of shapes and constructions. The lightness and rigidity of ACP and the ease in which it can be cut and machined makes it comparatively easy to install. It is particularly suited to printing using a variety of techniques (such as wide-format digital printing, screen printing).

This is an aluminum frame roll up standee with printed PVC media material which has a matte finish. The Standee come with aluminum rods, stands, cover, and lock. Banner media used in this standee is a heavy, high quality media with a fine glossy finish. This material is stiffer as compared to Flex and gives a much smoother and high-reflective appearance. We also have Standee with Matte finish made of Banner Media. We offer Roll up Standee which are ideal for promoting and showcasing. It can be utilized as a part of a reduced space and put forth a successful expression for your organization, item. We are thus can give you the best item quality and cost.

An illuminating flex glow-sign box, glow signs is an attraction for any brand to derive better mileage. Glow signs can be made it in different combination of material with 25mm square MS pipe covered with GI Sheet, Electrical for illumination, Printed flex or cut vinyl pasted on flex.

We offer Stainless Steel 3D Letters with Led Illuminated Sign for interior as well as exterior signages. These are available in customized options as desired by the clients and are offered at industry leading prices. Further, these have high end polish and finishing that makes it one of the most preferred choices amongst our buyers.

BEAUTY

The beauty nature is not limited to the phenomena of the universe and the collectiveness of the environment, but as well as the inherent characters. The beauty of nature in my opinion is intangible, can not be measured or compare too; It self balanced. The natural and unnatural whelm is uniquely beautiful, but the admiration of true beauty and nature differ by individuality. Contemplating, the universe and the diversity that I conclude every single living or non living substance within our environment summarize beauty as a whole, and proportionally contribute and compliment one or the other.

The beauty of nature is the simplicity, complicate yet splendorous way of seeing character, environment and the universe. It's an immense and endless admiration.

**EVERYTHING
HAS
ITS BEAUTY,
BUT NOT
EVERYONE
SEES IT.**

HEALTH

There is a well-known saying: If wealth is lost, nothing is lost. If health is lost, something is lost. If character is lost, everything is lost. It can be reasonably believed that no person in a sound mind would like to lose something even. A healthy man can work hard and earn wealth, whereas an unhealthy man can't do this. Moreover, it is said and that rightly so, that a sound mind lives only in a sound body. In the modern world brain is everything to get all that man desires, but health is a prerequisite for having a good brain. A student who works hard throughout the year has to bring out his knowledge on the paper on the day of examination. But if he does not enjoy good health, he may fall ill on the day of examination and thus all the labour done by him the whole year may just go down the drain.
